

**“Let There Be Light” (Gen 1:3):
An Interfaith Call for Energy Conservation and
Climate Justice**

Dear President Bush,

As a Jew, it is my belief that we have a moral obligation to protect God's creation, provide for future generations, and effect justice here and abroad. Energy policy must reflect these values. To do so requires us to quickly transition away from fossil fuels and nuclear energy and choose the safest, cleanest, and most sustainable sources of energy. The most lasting impact of our energy policy will be its effect on global warming. Your plan ignores this, even though you agree global warming is a major challenge. Through conservation, efficiency, and new technologies, we have the opportunity to create a clean, bright, and sustainable energy future. Though your plan offers modest support for some conservation programs and new technologies, it is steeply tilted toward expanding our use of energy sources which cause global warming, foul the air with pollution, and poison the land with radioactive waste. We must do better - for our children and grandchildren, for the earth, for the poor and vulnerable around the world - and, ultimately, for our Creator.

Sincerely,
